

About Internet Inventions

Internet Inventions is one of the new breed of companies that is able to create and develop Internet products and services rapidly. Internet Inventions also acts in the role of a start-up incubator and venture investment firm. Internet Inventions' mission is to create and develop successful new Internet technologies and related businesses that lead to acquisition or initial public offering during the opening moments of each market window.

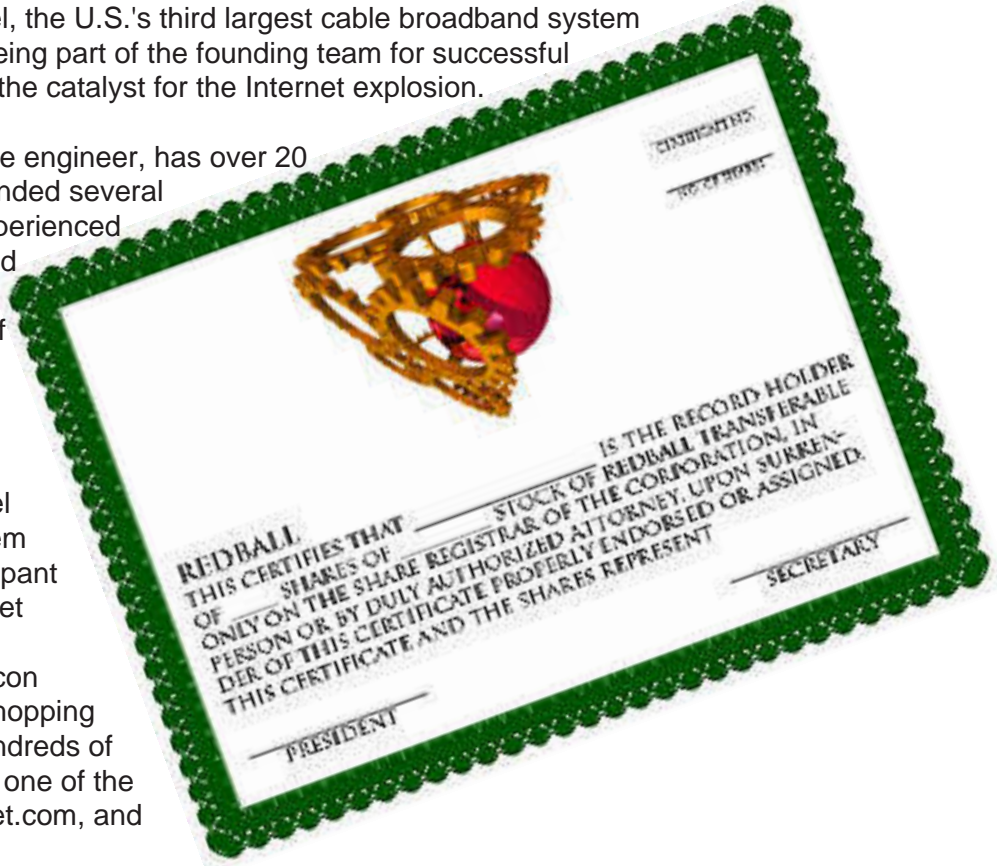

Funds continue to become available, however it takes more than money to successfully launch new technology based start-ups. The amount of money raised in an average round of funding is now over \$11 million according to the Money Tree. Internet Inventions helps to develop young companies by providing talent, ideas and money to turn them into successful ventures.

Internet Inventions is located in the heart of Silicon Valley and was founded in mid-1999, by a previously successful team of seasoned Internet entrepreneurs. Internet Inventions, a privately held company, has already helped launch several businesses with many more in the formative stages.

Longtime Silicon Valley entrepreneur and technology visionary, Bob Evans, along with co-founders Rod Beckwith, Les Laky, Bob Marzewski and Jim Newman, have an established record of founding successful companies, including MediaCity, which is now ISPChannel, the U.S.'s third largest cable broadband system integrator, or being part of the founding team for successful companies, including Netscape, the catalyst for the Internet explosion.

- Bob Evans started as a software engineer, has over 20 years of start-up experience, founded several technology companies and is experienced with start-up hurdles and deal and partnership structuring.
- Rod Beckwith was a member of the founding team at Netscape and was founder of Internet Systems, Inc. which Frontier bought for \$180M.
- Les Laky is a telcom and Nortel veteran, a pioneer in cable modem technology and a frequent participant at the Silicon Valley World Internet Center.
- Bob Marzewski, started his Silicon Valley career with the Internet Shopping Network and is the creator of hundreds of professional web sites, including one of the first newspapers, www.nevadanet.com, and one of the first African countries, www.malawi.com.
- Jim Newman ran a national manufacturers rep firm, called The Firm, which introduced new technology to computer super stores, mass merchants and wholesale clubs, and as VP Sales, launched unbundled phone services for Z-Tel, a national CLEC.

The five founders have enjoyed working together for many years. Internet Inventions was established as a method to incubate, grow and develop new businesses with the goal of an exit strategy in focus, keeping the team intact to enjoy a variety of technical opportunities.
